

Censoring the internet? Are you crazy? This is fucked up. I'm at a loss of words, really, to know what to say here. But that's alright because I know that countless others have already submitted more sophisticated and thought-out documents on this issue, and they will continue because this is a bad thing. I'm just submitting this anyways to add my voice to the growing numbers, because I know in an issue like this, every voice matters. Please realize and consider everybody in this, because this is certainly NOT what the people want and does not benefit anyone but the companies provided internet access that are already being paid loads of cash every day. Our country is already great in that it has internet freedom, let's protect that; we don't want to be so restricted like China and others. Thank you for taking the time to read this. Fuck you if you ignore the interests of the people and continue to push a bill that benefits off of the flaws of capitalism.
